

See the Unseen. Protect What's Valued

Your clients are carrying risk that conventional inspection cannot find.

Inaccessible rooflines. Hidden flashing failures, Deteriorating parapets. In heritage buildings, churches, and hospitality venues, the most damaging issues are routinely the least visible - and the most disputed at claim stage.

Three Weave changes that.

We deliver CAA-regulated aerial inspections and professional condition reports that give property owners, brokers and insurers a clear, evidenced picture of risk. Fast, non-intrusive, and completed without scaffolding or operational disruption.

For you as a broker this means:

Fewer claim disputes. Stronger client conversations. A genuine value add at renewal that sets you apart.

In 2025, adverse weather pushed overall UK property insurance payouts to £6.1 billion, with weather-related claims explicitly "spread across domestic, commercial and business interruption lines" ABI 2026

We work with brokers across two areas - with your clients directly, and with your insurer partners - across heritage, churches and hospitality.

If your portfolio includes any of these, this conversation is worth having.

Let's arrange 30 minutes.
